Art Unit: 1626

Lack of Unity Requirement

Claims 1-36, are drawn to more than one inventive concept (as defined by PCT Rule 13), and accordingly, a restriction is required according to the provision of PCT Rule 13.2.

PCT Rule 13.2 states that the international application shall related to one invention only or to a group of inventions so linked as to form a single general inventive concept (requirement of unity of invention).

PCT Rule 13.2 states that unity of invention referred to in Rule 13.1 shall be fulfilled only when there is a technical relationship among those inventions involving one or more of the same or corresponding special technical features.

Annex B, Part 1(b), provides that "special technical features" mean those technical features, which, as a whole, define a contribution over the prior art.

Annex B, Part 1 (e), provides combinations of different categories of claims and states:

"The method for determining unity of invention under Rule 13 shall be construed as permitting, in particular, the inclusion of any one of the following combinations of claims of different categories in the same international application:

- (i) in addition to an independent claim for a given product, an independent claim for a process specially adapted for the manufacture of the said product, and an independent claim for a use of the said product, or
- (ii) in addition to an independent claim for a given process, an independent claim for an apparatus or means specifically designed for carrying out the said process, or
- (iii) in addition to an independent claim for a given product, an independent claim for a process specially adapted for the manufacture of the said product, and an independent claim for an apparatus or means specifically designed for carrying out the said process,..."

This application contains the following inventions or groups of inventions, which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in response to this action, to elect a single invention to which the claims must be restricted.

Application/Control Number: 09/936,887

Art Unit: 1626

Group I Claim(s) 1-22, are drawn to compounds of general formula I, depicted in claim 1 and their pharmaceutical compositions, wherein $\mathbf{R_1}$ - $\mathbf{R_3}$ are as defined and $\mathbf{R_4}$ is substituted or unsubstituted phenyl.

Group II Claim(s) 1-22, are drawn to compounds of general formula I, depicted in claim 1 and their pharmaceutical compositions, wherein \mathbf{R}_1 - \mathbf{R}_3 are as defined and \mathbf{R}_4 is substituted or unsubstituted pyridyl.

Group III Claim(s) 1-22, are drawn to compounds of general formula I, depicted in claim 1, and their pharmaceutical compositions, wherein R_1 - R_3 are as defined and R_4 is substituted or unsubstituted thiophene or furan.

Group IV Claim(s) 1-22, are drawn to compounds of general formula I, depicted in claim 1, and their pharmaceutical compositions, wherein R_1 - R_3 are as defined and R_4 is substituted or unsubstituted indole or pyrrole.

Group V Claim(s) 1-22, are drawn to compounds of general formula I, depicted in claim 1 and their pharmaceutical compositions, wherein R_1 - R_3 are as defined and R_4 is substituted or unsubstituted thiazole or imidazole.

Group VI Claim(s) 23-36, are drawn to a method of use of compounds of formula I.

The inventions listed as Groups I-V do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding. structural element(s) that define the "special technical feature" necessary to specify a

contribution over the prior art. The structural moiety common to groups is

Application/Control Number: 09/936,887

Art Unit: 1626

which does not define a contribution over the prior art. The substituents vary extensively and when taken as a whole result in vastly different compounds. Accordingly, unity of invention is considered to be lacking and restriction of the invention in accordance with the rules of unity of invention is considered to be proper. Additionally, the vastness of the claimed subject matter and the complications in understanding the claimed subject matter imposes a burden on any examination of the claimed subject matter.

The inventions of Group I-V are distinct, each from the other, because they differ in structure and/or element so as to be patentably distinct and a prior art reference anticipating but one of the groups would not render obvious the other groups under 35 U.S.C. 103. Groups I-V are unrelated because divergent subject matter of compounds exists and each group is capable of supporting its own patent.

The methods of use claims will be examined along with the elected invention and commensurate in scope therewith.

An attempt was made to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement is traversed (37 CFR 1.143). Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Telephone Inquiry

Any inquiry concerning this communication or earlier communications from the

examiner should be directed to Kamal Saeed, Ph.D., whose telephone number is (703) 308-4592.

The examiner can normally be reached on Monday-Thursday from 8:30 AM - 5:00 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's

supervisor, Mr. Joseph K. McKane, can be reached at (703) 308-4537. The Unofficial fax phone

number for this Group is (703) 308-7921. The Official fax phone numbers for this Group are

(703) 308-4556 or 305-3592.

When filing a FAX in Technology Center 1600, please indicate in the Header (upper

right) "Official" for papers that are to be entered into the file, and "Unofficial" for draft

documents and other communications with the PTO that are not for entry into the file of the

application. This will expedite processing of your papers.

Communications via Internet e-mail regarding this application, other than those under 35

U.S.C. 132 or which otherwise require a signature, may be used by the applicant and should be

addressed to [joseph.mckane@uspto.gov]. All Internet e-mail communications will be made of

record in the application file. PTO employees will not communicate with applicant via Internet

e-mail where sensitive data will be exchanged or where there exists a possibility that sensitive

data could be identified unless there is of record an express waiver of the confidentiality

requirements under 35 U.S.C. 122 by the applicant. See the Interim Internet Usage Policy

published by the Patent and Trademark Office Official Gazette on February 25, 1997 at 1195 OG

89.
